FYI,

Just so you know. Likely in response to issue in Hoosick Falls NY and the NY DOH and DEP calling out the EPA administrator to take action.

Mark

Hi Andrew, Mark and John,

I'm working on some SSWR ALD duties this week and was asked to collect any data related to NERL research in PFOA/PFOS. I know there's not much in the SSWR charters and that most of what is currently listed appears to be NRMRL work, however in looking into this your names came up as good folks to contact. Could you please let me know if you are working on PFOA/PFOS or recently completed a project? If so, do you have anything handy that I could use to put together a summary (a project proposal/language from a QAPP etc).

If you have anything, could you send it to me today? If you'd rather just discuss it, could you give me a call?

My apologies that this is coming so late-when I first looked at the charters it didn't look like we had anything and your names just came up this morning.

Thanks,  
Ann

Please let me know of any pfoa/pfos related research. I would guess they are looking at a short paragraph summarizing current status. I cc'd Dr Mills and I know that Chris Lau has been front and center for health effects (but I don't know if that work is current or completed)

Please send a draft paragraph to me and I will collate for SSWR.

C

**Subject:** Request for information on PFOA/PFOS

Hi Folks –

Tom asked me to pull together some information about PFOA and PFOS. I've put together a background document (attached) which some of the history and current activities in the agency. Many thanks to OSP for assistance with this!

I'd like to add some brief information about ongoing research in ORD related to perfluorinated compounds. Can you please add some relevant summary information for work within your programs? I'm not looking for anything extensive – just one paragraph very briefly describing work in your program. If your research program isn't conducting any work on perfluorinated compounds, just let me know.

I'd appreciate a response by COB Wednesday, Jan. 20.

Thanks!
